

MAXEL GAME REEL BRIEF

For many years Maxel has quietly produced quality spinning and trolling reel parts for various companies. These reels have been sold and marketed all over the world.

In the past three years, Maxel has been developing a new and exciting line of Big Game Fishing Reels. Recognizing the rigors of Big Game Fishing and the precision required to enjoy this type of activity, we have spent years working on the research and testing required to make a superior product. These reels are specifically designed for Medium and Big Game Fishing with sizes ranging from a 12 to an 130. Smooth effortless free spool combined with smooth, strong drags will enhance your deepsea fishing experience.

With a careful blend of Chinese manufacturing skills and American design and technology, the Maxel SeaWolf series of fishing reels has finally been released to the world. Made of almost entirely high quality machined aluminum and stainless steel, we at Maxel believe we have developed a product you can confidently use for a lifetime.

Thank you for trying our Maxel big game Reels !!!
